

Employees are increasingly using mobile devices for work, and the very things that make those devices easy to use are putting your company and customer data at risk. SHI can help. We provide custom, end-to-end mobility solutions, subject matter experts, device level configurations, server-side implementations, and manufacturer-certified technicians to help your workforce stay productive while ensuring data remains protected.

WE OFFER:

STRATEGIC PLANNING

Partnered with Vox Mobile, SHI mobility consultants assess the current state of your mobility environment and identify opportunities for enhancement. We help you deploy, manage and secure mobile devices—whether company or employee-owned—to achieve your vision and maximize competitive advantage.

IMPLEMENTATION

Our configuration center—capable of handling device rollouts in the tens of thousands—can prepare, package and ship devices to users around the world. From simple kitting of devices with their accessories and documentation to the most complex set of software loads and account activations, SHI has solutions for all your mobility requirements.

SUPPORT

Certified technicians are available 24/7 to support cell phones, Android phones and tablets, BlackBerry smartphones, iPads, iPhones or Windows phones. We answer your end-user with a customized greeting and respond to their technical support, replacement or upgrade request as a seamless extension of your internal helpdesk.

SHI can roll out large numbers of mobile devices with a similar “standard image” to what you would expect on your laptops and desktops. Automated processes for creating Apple and Google Play IDs make it simple for us to load all of your apps onto your smartphones and tablets —before they reach your loading dock.

MOBILE DEVICE MANAGEMENT

SHI employs subject matter experts on all of the major mobile device management solutions to help you make unbiased yet informed choices for your environment. With flexible end-to-end solutions, SHI supports all types of environments. Our capabilities include license procurement and renewals, device-level configurations—before being received by the end-user—server-side implementations and 24/7 access to manufacturer-certified technicians. Your business runs on data, we protect it.

SUPPORTED PLATFORMS

SHI can configure all market-leading mobile devices. Our configuration center is able to customize the software on any device to your exact specifications. We are experienced in all levels of deployment, ranging from single devices to thousands.

Corporate Reseller

Microsoft

BlackBerry

CARRIER ACTIVATION

Cellular-enabled devices can be seamlessly added to your corporate plan on the carrier of your choice. Our facilities capture any information required for the cellular carriers to activate devices, and SHI can communicate directly to the carrier in their compatible format of choice.

DEVICE ACCESSORIES

Ensure that all of your smartphones and tablets are charged, connected and protected by selecting the perfect accessories from leading peripheral manufacturers. Ask us for suggestions on popular accessory kits for executives, field sales, warehouse workers, students, faculty or personal use.

ABOUT SHI
